

Clinical PK/PD Data Analyst

Kinesis Pharma is currently looking for a Clinical Pharmacokinetic (PK) / Pharmacodynamic (PD) Data Analyst.

Kinesis Pharma is the preferred provider for many innovative pharmaceutical companies that outsource their pharmacokinetic analysis, including some of the top 10 biggest pharmaceutical companies. A team of well trained PK/PD data analysts and report writers, supervised by experienced consultants with a solid background in clinical pharmacokinetics, is committed to delivering optimal quality within agreed timeframes for each PK/PD analysis. Noncompartmental PK analyses (NCA) have been performed for all type of Phase 1 studies including first-in-man, ADME studies, drug-drug interaction studies, bioequivalence and bioavailability studies, studies in special populations and other PK studies during phase 2/3. Specific software like Phoenix WinNonlin as well as SAS routines are among the programs used for NCA and reporting of the data in tables and graphs, including exploration of PK/PD relationships. Each pharmacokinetic analysis is performed according to GCP based standard operation procedures using validated software.

The PK/PD analyst is part of the clinical department and collaborates closely with other analysts, the responsible consultant and the pharmacokinetic group leader.

Your Profile

The successful candidate will have at least a bachelor degree (or comparable working level) with experience or affinity with handling of clinical data. Working knowledge of a programming language such as SAS is an advantage. Valued personal attributes include an enthusiastic and analytical mindset, precise and effective communication and social skills. A good knowledge of the English language is essential.

Kinesis Pharma, a unique concentration of multidisciplinary experts

Kinesis Pharma, member of the Venn Life Sciences Group, is an international operating organization with headquarters in Breda, the Netherlands. The Kinesis organization is modelled on the classical disciplines of drug development including clinical, non-clinical, chemistry manufacturing and control, regulatory affairs and project management. Kinesis leverages the expertise and experience of its highly-skilled workforce to accelerate development of medicinal products, either small molecules or biologics. The combination of multidisciplinary experts - with a direct and pragmatic approach - provides clients with 'plug-and-play' service options and gives employees the opportunity to broaden their knowledge and expertise in drug development. The working environment in the 50-staff company is informal, collegial and collaborative.

The contract appointment is for a minimum of one year, however change into a permanent contract is definitely possible. Kinesis offers an employment with excellent primary and secondary conditions.

For more information or for application and CV, please contact conny.vandelinde@venncro.com or +31 76 54 80 666. Your letter of application and CV may also be sent by regular mail to: Conny van de Linde, Kinesis Pharma BV, Lage Mosten 29, 4822 NK Breda, The Netherlands.

Acquisition regarding this vacancy is not appreciated.
