

HOW TO INCREASE THE SUCCESS OF DRUG DEVELOPMENT WITH SMART DESIGN?

*Many Drugs May Be Destined To Fail,
But a Lot Can Be Done To Mitigate The Risk...*

Attrition Rates in Drug Development:

Preclinical

~33%

Phase I

~49%

Phase II

~77%

Phase III

~45%

KEY CRITERIA FOR SUCCESS

- Efficacy
- Safety
- Pharmacokinetics
- Formulation
- Strategy
- Commercial Planning

"To reduce risks and improve the probability of success in drug development, the drug discovery process needs to be "smartened up". This is done by evaluating and addressing potential drug development issues during discovery and ensuring a smooth transition between preclinical and clinical stages"

**Rob Riley, Executive VP Global DMPK
& ADME-Tox at Evotec**

Evaluate Key Development Issues & Strengthen Your Drug Development By...

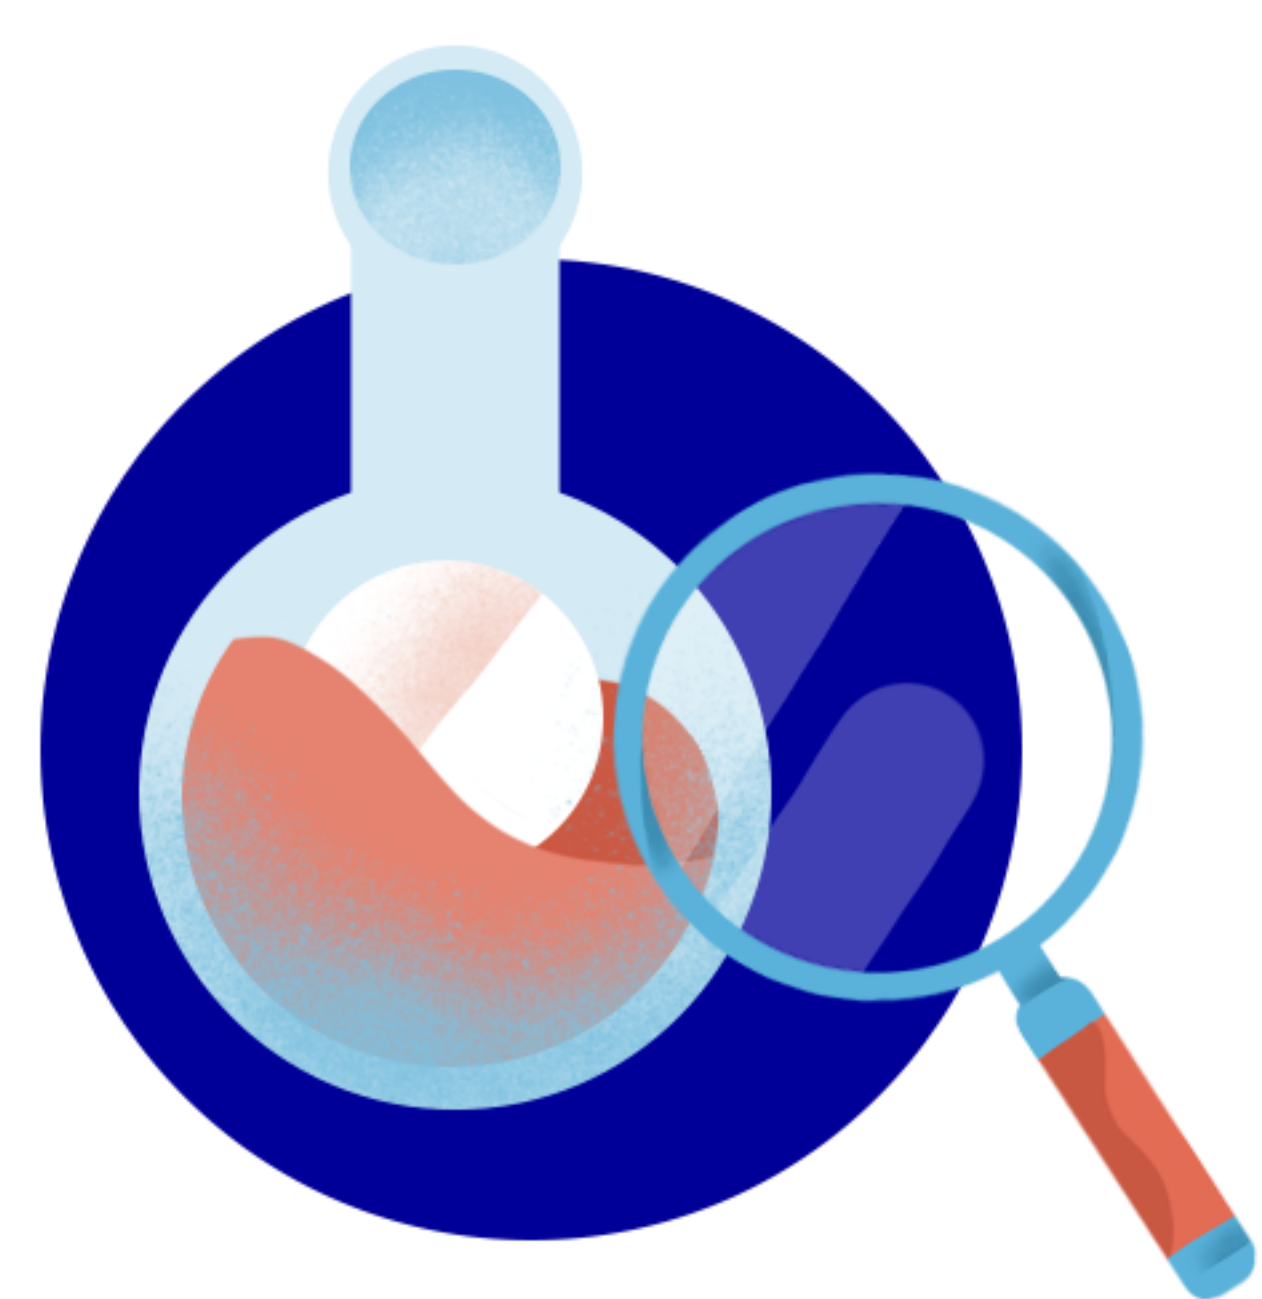

- Enhancing the quality of selected drug candidates
- De-risking compounds before development
- Creating a smoother transition between discovery & development
- Increasing the probability of success later in development
- Saving time & money overall

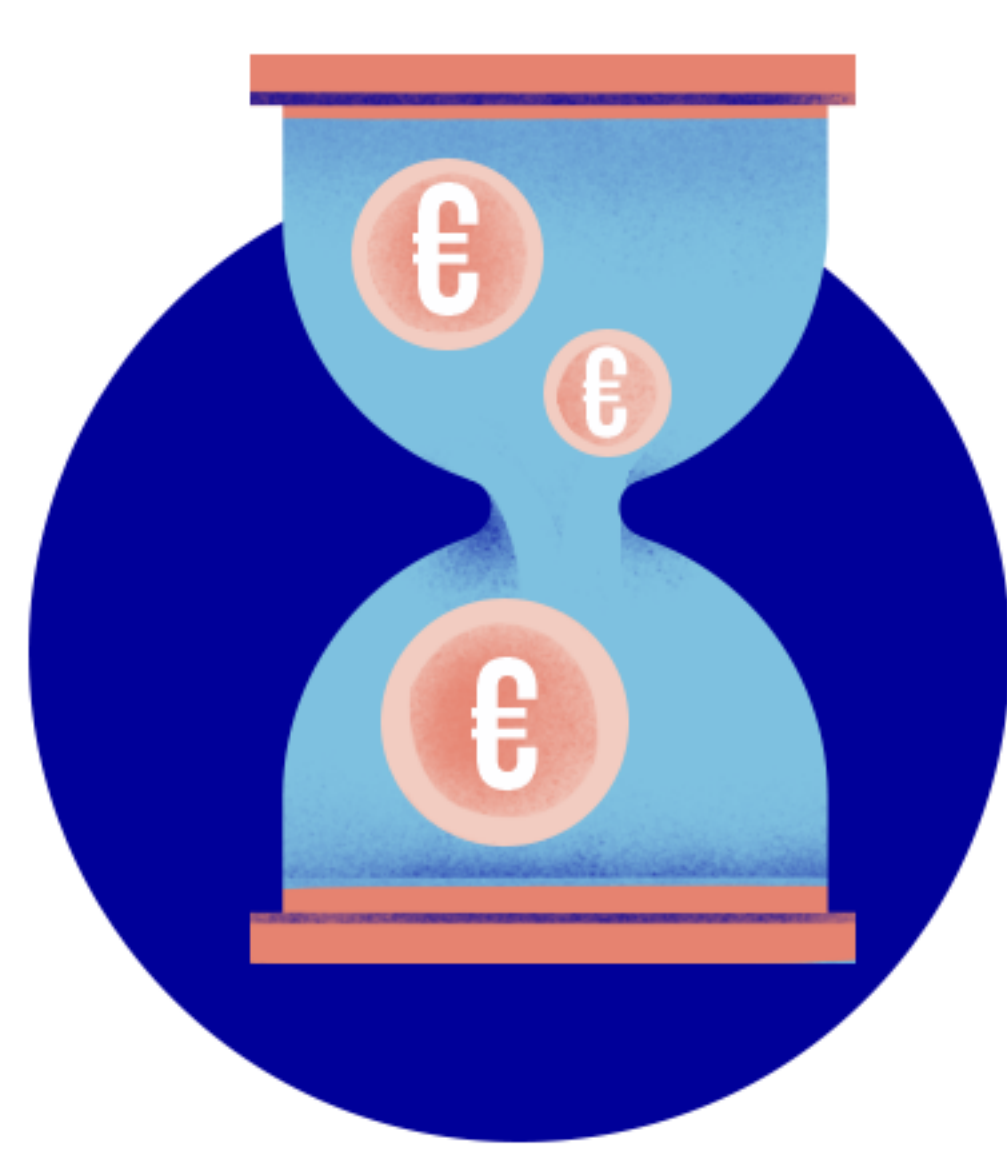

INDiGO-Select – Smart design for your clinical development candidate!

When working on an integrated drug discovery project within Evotec, creativity, innovation and attention to developability are all aligned within lead optimisation. But when a molecule is brought to Evotec in the advanced lead optimisation or pre-development stage, it would recommend the initiation of an INDiGO-Select program to identify and access developability gaps and liabilities to enhance the probability of success of clinical candidates in line with the Target Product Profile.

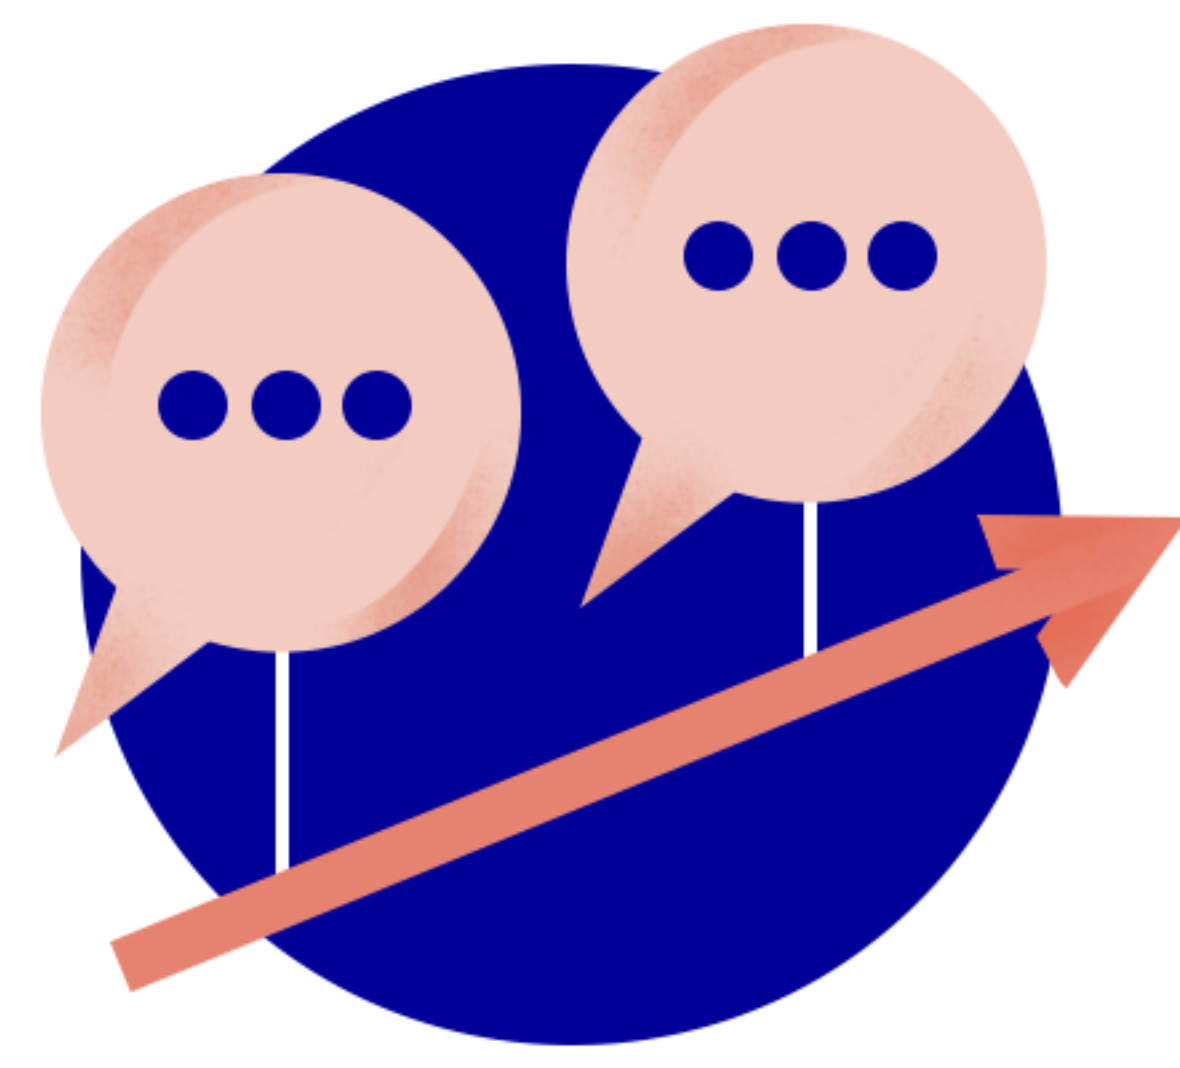

Why Choose INDiGO-Select?

Integrated discovery
& development enables
earliest identification
of prototypes

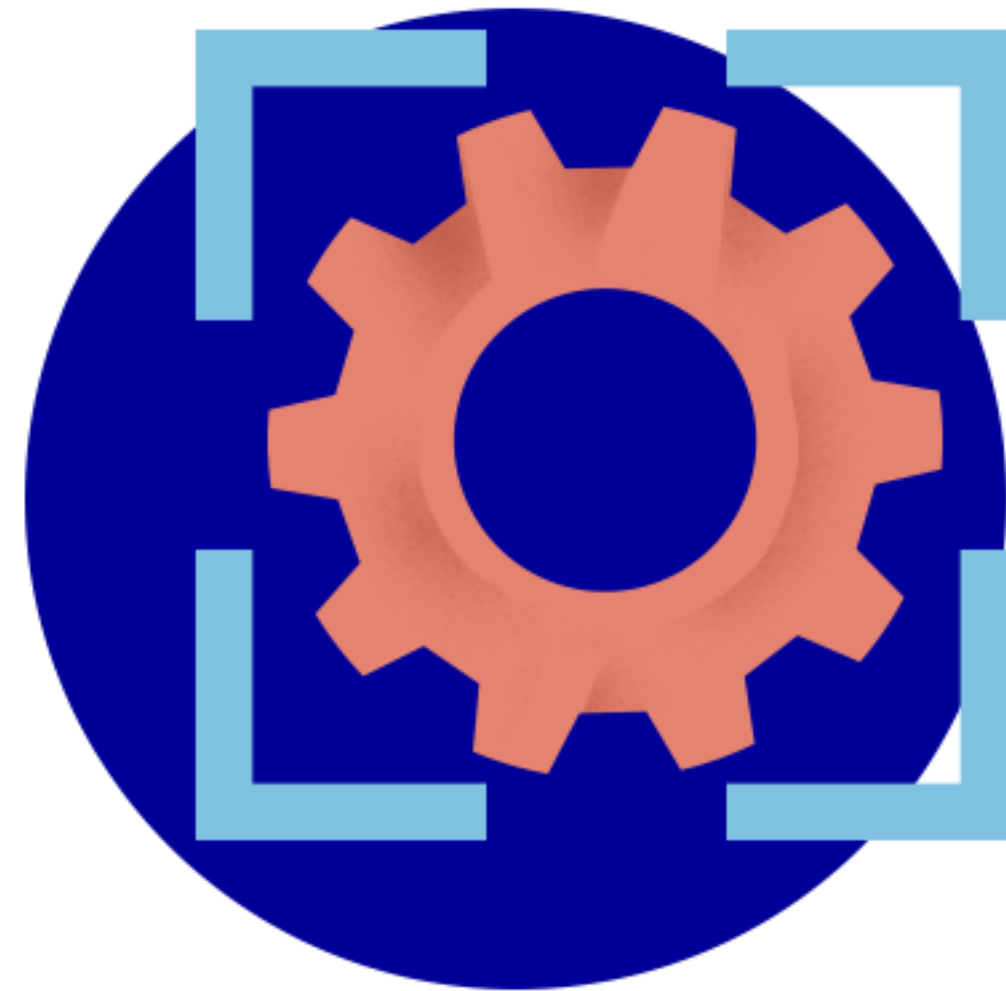

Liabilities addressed early can
solve problems at a lower cost
with more options
& flexibility for modification

Integrated processes allow
smooth project progression,
minimal handovers
& efficient communication

Drug development experts
for higher scientific solutions
& dedicated project managers

"Under one roof" results
in flexibility & efficiency

START YOUR SMARTER DESIGN NOW!
